

I recognize the importance of protecting our natural environment. I believe in establishing long-term relationships with the communities near which proposed development is to take place. The City must make great efforts to maintain open lines of communications with the Grand view Heights/ South Surrey communities, and stakeholders. If elected as your Councillor, I will request a feasibility study to avoid negative impacts on your community and enhance positive ones. Extensive density leads to traffic issues, crime and the loss of habitat and natural landscape which is essential to preserving the natural Grand view Heights/ South Surrey . When developers apply for amendments to zoning, it must be discussed with your long term neighbourhood residents. The neighbourhood is owned by those who live in it.

Thank you.

Rick Scorsese

Candidate for City Council
