

Tree Retention Notes:  
 1) For trees located on lot #'s 28, 29, 30, 31 and 32 the adjacent driveway and new services are to be installed using low impact methods under the on-site direction of the project arborist. Please refer to Section 8 appendix - 2 of the DHC Arborist Report Dated October 20 for the Aerialled sub-base concept detail.  
 2) The BC Hydr service ducts must be installed under the on-site protection of the project arborist. Hydro excavation for the trench may be required adjacent the TIZ.

Adjacent the PZ of off-site trees must be underlain with on-site supervision by the Project arborist.

NOTE: Removal of off-site trees requires a separate Tree-Cutting Permit Application signed by that property owner.
